Secretary
Finance and Administration Cabinet

Jim Barnhart
Deputy Commissioner

MEMORANDUM

TO: All Agency Contacts

FROM: Jim Barnhart, Deputy Commissioner
Commonwealth Office of Technology

DATE: August 27, 2008

SUBJECT: McAfee Enterprise Licensing

The McAfee pricing for the Commonwealth of Kentucky made available thru the Dell contract expired on June 30th, 2008. COT recently negotiated an enterprise purchase of the McAfee Total Protection for Endpoint Suite (ToPS) for the Commonwealth. An enterprise purchase provides the most cost effective solution for the Commonwealth, and it provides a product suite that contains additional components for stronger protection against malware, spyware, and hacker attacks. The McAfee ToPS Suite includes McAfee Anti-Virus for Desktops/Servers, McAfee Anti-Spyware for Desktops, and McAfee Host Intrusion Prevention (HIPS) for Desktops.

COT purchased 34,000 licenses for the McAfee ToPS Suite, including an upgrade license for the ToPS Suite and two years of maintenance. When it is time to renew your McAfee licenses, please contact COT to take advantage of the enterprise license. For agencies using COT managed services, McAfee is included in your monthly rates. For non-consolidated agencies, the McAfee license costs will be inter-accounted from COT.

The cost per node for the McAfee ToPS Suite will be \$7.73 for the first year, which includes the perpetual upgrade license and one year of software maintenance. The second year cost will be \$7.85 per node.

To order, send an e-mail to COT.AssetProvisioning@ky.gov. See detailed information about ordering McAfee products at the COT Security website:
